

# Near field probes for Tektronix EMC pre-compliance

## EMI-NF-PROBE (TEKBOX TBPS01 offered by Tektronix)

The EMI-NF-PROBE is the TEKBOX TBPS01. This set of magnetic field and electric field probes is for radiated emissions EMC pre-compliance measurements. The probes are used in the near field of sources of electromagnetic radiation and serve to locate and identify potential sources of interference within the building blocks of electronic assemblies. The probes act similar to wide bandwidth antennas, picking up radiated emissions from components, PCB traces, housing openings or gaps, and from any other parts that could be emitting RF. The probes are usually connected to a spectrum analyzer.

### Key features

- Slim design for good access in between tightly spaced components
- Shielded loops to avoid picking up common mode noise; insensitive to the human hand
- Frequency range up to 6 GHz
- Insulated with rubber coating

### Applications

- Radiated EMC measurement
- RF immunity testing
- Contactless (load free) relative measurement of RF signal chains
- Contactless (load free) relative measurement of oscillators, modulators, etc.

# Specifications

**Near field probes**

Frequency range 1 MHz –1 GHz

Dimensions

Probe	Length	Loop	Tip
H20 H-Field (magnetic)	170 mm	20 mm	N.A.
H10 H-Field (magnetic)	170 mm	10 mm	N.A.
H5 E-Field (electric)	170 mm	5 mm	N.A.
E5 E-Field (electric)	170 mm	N.A.	5 mm

Frequency response  
(magnetic field probes)

Frequency response (electric field probes)

## Ordering information

### EMI-NF-PROBE and related accessories

Item	Description
EMI-NF-PROBE	EMC probe set consisting of H20, H10, H5, E5, 75 cm SMB to SMA cable, measurement plots
EMI-NF-AMP	20 dB wideband amplifier with cable

### Service

All service provided by TEKBOX Digital Solutions. Contact <https://www.tekbox.net/> for product information and service.
